| S.N | NAME OF ASSISTIVE DEVICE | DEFINITION | SPECIFICATION |
|-----|---|--|---|
| 1. | Axillary Crutches ISO Code: 12.03.12 | Devices providing support when walking that have a horizontal padded support that is placed against the upper body next to the armpit | <ul style="list-style-type: none"> Constructed from aluminum alloy tubes. Standard thickness. High density rubber horizontal bar, cushioned, fitting under the axilla Handgrip: high density rubber/ plastic covered handle, pistol grip or rounded. Leg and arm sections adjust independently for optimum sizing-both floor to handgrip height and the distance between the handgrip and the axilla pad is adjustable. Tips: non-slip, and replaceable/ interchangeable, usually made of durable rubber, meets ISO standards. Available in small, medium or large sizes Double molded hand grip with soft cushioning Height-adjustment mechanism: double height adjustment (handgrip and shaft) Rubber Tips/Ferrule securely fitted and made from durable rubber with steel washer built inside. Max/min adjustable height: 984/745 ± 5 mm Weight bearing capacity: 120kg Size: Large, Medium, Small (depending on the age/condition) |
| 2. | Elbow Crutches ISO Code: 12.03.06 | Devices, adjustable in height, providing support when walking that have a semi-circular support for the elbow, a horizontal hand grip, a single shaft, and one tip | <p>Designed for short- or long-term use by children or adults who require support to maintain balance or bear weight through their legs due to injury, disability, or surgery recovery.</p> <p>1. Cuff</p> <ul style="list-style-type: none"> Closed or semi-circle design for secure forearm placement Hinged or fixed attachment for adjustability and ease of movement Material: Durable, lightweight, and non-abrasive plastic or composite material Comfort & Fit: Ergonomically contoured to provide secure yet comfortable forearm support Padding optional for added comfort and pressure relief <p>2. Handtip</p> <ul style="list-style-type: none"> Ergonomically molded for a natural grip Material: Non-slip, high-density rubber or thermoplastic for durability and comfort Orientation: Left and right-hand specific grips where applicable <p>3. Shaft</p> |

5. Manual Wheelchair with cushion
ISO Code: 12.22.03

Types:

- Active
- Semi-active
- Rough terrain

Intended to be self-propelled by the users by pushing arms or wheels. Can be used indoor/outdoor and on various types of terrain.

• Equipped with soft foam hand grips for enhanced comfort and slip resistance.

- Suitable for prolonged use by children, adults, and elderly users.

6. Dimensions & Size Options

- Width: 52 cm (standard); narrower versions for pediatric use as needed
- Height Range (Adjustable):
- Children: 50 cm - 65 cm
- Youth: 66 cm - 78 cm
- Adults: 79 cm - 91.5 cm
- Available Sizes: Small (Child), Medium (Youth), Large (Adult/Elderly)

5. Weight & Capacity

- Walker weight: Approximately 5.3 kg (may vary slightly with size)
- Weight-bearing capacity: Up to 125 kg for adult and bariatric models
- Pediatric models designed for safe load-bearing as per age/weight standards

• Active/Semi-active wheelchair
Wheelchair with folding or rigid frame, three or four wheels with large rear wheels, seat and backrest, armrests and footrests

- Frame: frame with mechanism(s) to fold or dismantle
- High quality steel or aluminum frame-125kg capacity
- Backrest or back posts with adjustable height or supplied with range of back posts with fixed height.
- Detachable, Swing Away Armrests.
- Detachable, Swing In, Swing Out Leg rest
- Footrests: with adjustable height to accommodate people with shorter and longer legs. Two flip-up, swing-away or removable footrests on folding frame
- Rear wheels: quick-release or removable without tools
- Puncture-proof, pneumatic rear tyres and front castors
- Anti-tippers for extra safety on slopes and uneven ground.
- Cushion:
Supplied with cover that meets general design requirements; for users with incontinence, a water-resistant cover or lining to protect cushion should be supplied
 - overall height approximately 70-120 mm
 - allows full or deep offloading or immersion (sinking into) and envelopment (conforming to shape) 40-45 mm) or deeper
 - different length options or adjustable in length
- Rough terrain wheelchair

*✓ ✓ Sneha Khadka
Physiotherapist*

Wheelchair with folding or rigid frames; four or more wheels with two larger drive wheels; seat and backrest; and footrests behind front castors

- May be lever-propelled
- Longer wheelbase than active wheelchair; larger overall length than transport wheelchair with large rear wheels
- Low center of gravity to ensure stability
- Rear wheels and castors appropriate for outdoor rough terrain

Frame: frame with mechanism(s) to fold or dismantle, push-handles can be integrated into frame, supplied as an add-on component or omitted, integrated stability options for feet, backrest or back-posts with adjustable height or supplied with range of back-posts with fixed height

Backrest: tension-adjustable backrest or rigid backrest that can be adjusted independently from back-posts, quick-release mechanism to be removed to allow folding

Footrests with adjustable height. Two flip-up, swing-away or removable footrests on folding frames.

Rear wheels (manual propelling): with push-rims or lever-propelled and quick-release or removable without tools for rigid frames for transport; optional for wheelchairs with folding frame. Wider or larger-tread tyres

Puncture-proof or pneumatic, rear tyres and front castors

Rear and front wheels (lever propelling): size and width of front and rear wheels appropriate for rough terrain and wheelchair design, three or multiple wheels, puncture-proof or pneumatic wheels

Cushion:

Supplied with cover that meets general design requirements; for users with incontinence, a water-resistant cover or lining to protect cushion should be supplied

- overall height approximately 70–120 mm
- allows full or deep offloading or immersion (sinking into) and envelopment (conforming to shape) 40–45 mm) or deeper
- different length options or adjustable in length

Compliance

- ISO standard/CE certified
- Designed for durability, urban maneuverability, and short uneven-terrain use
- Load capacity: Min. 100 kg
- Suitable for users with advanced mobility skills or moderate needs
- Standard quality

Accessories

- Anti-tip bars, headrest, seatbelt
- Foldable for transport
- User manual and maintenance guide included

Semi-Digital and Digital hearing aids with program and volume control
ISO Code: 22.06.15

Devices worn behind the ear to amplify sound.

Registration No. 21

N

Registration No. 21
N

1. Product Description
Personal amplification devices designed to assist individuals with mild to profound hearing loss. Devices are body worn or ear level and include behind-the-ear (BTE) or in-the-ear (ITE) types, suitable for pediatric and adult use.

2. Categories

- **Semi-Digital Hearing Aid:** Digital Signal Processing (DSP) or programmable features via computer/software.
- **Digital Hearing Aid:** Fully digital with DSP, programmable multiple channels, noise reduction, and feedback management.

3. General Specifications

| Feature | Semi-Digital | Digital |
|------------------------|--------------------------------------|---|
| Technology | Digital hybrid | Full DSP |
| Channels | 2-4 channels | ≥ 4 channels (typically 4-16) |
| Fitting | Computer programmable | Computer programmable |
| User Controls | Volume control, on/off switch | Program selector, volume control (optional auto-gain) |
| Output Limiting | Peak clipping or compression | Wide Dynamic Range Compression (WDRC) |
| Noise Reduction | Basic | Advanced (adaptive) |
| Feedback Cancellation | Basic | Adaptive/automatic |
| Microphone | Omni-directional | Omni or directional (adaptive optional) |
| Battery Type | Zinc-air or rechargeable | Same |
| Battery Size | 13, 312, or 675 | Same |
| Battery Life | Minimum 120 hours | Minimum 100 hours |
| Ear Mold Compatibility | Standard BTE ear hook | Same |
| Telecoil | Optional | Optional or integrated |
| Operating Conditions | 0°C to 45°C, RH 0-90% non-condensing | Same |

4. Performance & Standards

- Frequency Range: 250 Hz – 6,000 Hz
- Max Output (OSPL90): ≤ 135 dB SPL (BTE standard)
- HFA Gain: 30-60 dB (depending on model)
- Total Harmonic Distortion (THD): ≤ 3%
- Compliance: IEC 60118-0, 60118-7, WHO APL

5. Design Features

- Lightweight, tamper-resistant casing (IP52 or better)
- User-friendly controls
- LED indicator (for rechargeable models)
- Compatible with standard ear molds or custom shells

Sneha Khadka
Physiotherapist

6. Accessories Included

- Carrying case
- Cleaning tool
- User manual (pictorial/manual)
- Spare tubes/domes (if applicable)
- Batteries (starter pack or rechargeable unit with charger)

Air Mattress / Pressure relief mattress
ISO Code: 04 33 06

Effective alternating pressure system and is an ideal for prevention and bedsores treatment of patients at low risk of pressure ulcers.

1. Purpose: Provides redistribution of pressure to prevent skin breakdown and promote healing of pressure ulcers in patients who are bedridden, post-surgical, or have limited mobility.

2. Types

- Foam Mattress: High-density or multi-layered foam with contoured zones
- Alternating Pressure Mattress (APM): Uses air cells that inflate and deflate cyclically via pump
- Gel or Hybrid Mattresses: Combine foam and gel layers or air-cell systems for advanced support

3. Construction & Material

- Top Cover: Waterproof, breathable, and antimicrobial fabric (e.g., PVC-free polyurethane), Removable and washable
- Core Material: Foam: High-resilience (HR) or viscoelastic (memory) foam
- Air: air cells with medical-grade pump, Optional gel-infused zones or corrugated surfaces for enhanced pressure distribution
- Base: Non-slip bottom surface for stability on the bed frame

4. Pressure Redistribution Features

- Zoned pressure mapping to reduce peak pressure on sacrum, heels, and shoulders

5. Dimensions

- Standard Adult Size:
- Length: 190–200 cm
- Width: 85–90 cm
- Thickness: 10–15 cm (foam); up to 20 cm (air or hybrid)
- Pediatric and Bariatric Sizes as per the height and weight to be provided.
