Section 7. Terms of Reference For Preparation of Detailed Project Report (DPR)

Damak Multipurpose Park
Damak Municipality, Jhapa

1. Background

1.1 Introduction

Damak Municipality intends to develop a "Damak Multipurpose Park" at Ward No. 2 of Damak Municipality, Jhapa District which had long served as a settlement center for Bhutanese refugees. Covering an area of approximately 12 bighas, this land was managed with the support of the United Nations High Commissioner for Refugees (UNHCR). However, following the resettlement program under which most refugees were relocated to other countries, the area has remained as forest land.

The municipality has proposed a long-term plan at Hamse Dumse Samudayik Ban to promote tourism preserving the natural environment, developing infrastructure that directly benefits local communities, and creating opportunities for education and training. The project aims to promote cultural and historical heritage of the Bhutanese community, eco-tourism, cultural tourism, biodiversity conservation, local employment generation, entrepreneurship development, and sustainable urban development.

This initiative will contribute to economic growth through tourism while creating income-generating opportunities for local communities. In addition, it will support the municipality's economic upliftment by encouraging entrepreneurship in local products and service sectors. The project will remain centered on preserving the historical lifestyle of the Bhutanese community while addressing various goals of sustainable development. By safeguarding citizens' arts and culture and developing the area as a tourism destination, the plan is expected to become a new dimension for the economic empowerment of local residents.

1.2 Present Condition

This project area is located in Ward No. 2 of Damak. The total area of the site is 49 bigha, 6 kattha, and 18 dhur, which is enclosed by boundary walls on all sides. Within the area, there is one pond and three small houses. Despite having significant potential, the area has not yet been systematically developed for any specific purpose, and therefore has remained largely as open land with scattered vegetation. As an important source of biodiversity, the area contains approximately 20 Sal trees, 300 mango trees, 3,000 sisau plants, and 3,800 teak trees. There is a long-term plan to conserve and further expand these natural resources.

This area has the potential to become a new destination that can contribute to Damak Municipality as a long-term center for economic growth, tourism, and cultural preservation. By systematically developing the area while ensuring environmental conservation, the municipality plans ten distinct yet interconnected projects to be developed as part of a multi-year program under the slogan: **"Green Renaissance: Biodiversity Conservation and Sustainable Tourism Promotion."** This

development is expected to attract local, national, and international tourists. Furthermore, as the area will be directly connected to the international stadium planned in Damak, the currently underutilized site holds significant potential across multiple sectors.

PART II

Section 8. Conditions of Contract and Contract Forms

Foreword

1. Part II includes standard Contract forms for Consulting Services (a Lump-Sum Contract).
2. **Lump-Sum Contract:** This type of contract is used mainly for assignments in which the scope and the duration of the Services and the required output of the Consultant are clearly defined. Payments are linked to outputs (deliverables) such as reports, drawings, bill of quantities, bidding documents, or software programs. Lump-sum contracts are easier to administer because they operate on the principle of a fixed price for a fixed scope, and payments are due on clearly specified outputs and milestones. Nevertheless, quality control of the Consultant's outputs by the Client is paramount.
